

# angel TREE MISSION

## *The Gomez Family*

### **Battling: 15-year-old, Estela**

Jamie's Hope supporters helped bring a glimpse of joy to the Gomez family last year and we are honored to do it again as they are now battling an even more aggressive disease.

Estela, now 15-years-old, began battling Leukemia in 2012. They thought she had been in the clear after being in remission for almost a year; then, she relapsed in March 2016. Since then, Estela has lived at Texas Children's Hospital. She continued to get chemo treatments, however, they were simply to keep the disease at bay until she could

receive a transplant donor. Luckily, Estela's sister was a match and she received her transplant on September 1<sup>st</sup>.

Estela's situation is very delicate. Her mom, Gloria, stays with her as her father, Genaro, stays home with her three siblings, Isabel (age 17), Gloria (age 9) and Raphael (age 5).

*This year we join to help this family have a wonderful Christmas!*
