

# angel TREE MISSION

## *The Chavez Family*

### **Battling: 79-year-old, Josephine Chavez**

Five years ago, Josephine was diagnosed with breast cancer and then in June of 2016, she underwent a mastectomy. Today she continues to battle this dreaded disease and is considered Stage IV. Although the battle has been long & the journey difficult, the Chavez house is a home full of love. In Josephine's home, she has her two sons and her daughter-in-law's family which includes a four-year-old granddaughter & 1-week-old grandson.

Normally, with this many people under one roof, the cost of living grows exponentially, even with everyone able to contribute to family funds. But throw in one family member not being able to work because of a medical condition and another with breast cancer and things start to get out of control quickly.

Bills and health concerns are weighing Josephine down. Soon she will not be able to afford her car, much less her doctor appointments. This house of love could use a little extra love for Christmas.

*This year we join to help this family have a wonderful Christmas!*
